Skills

- JavaScript
- Software development
- Node.js
- React.js
- Python
- Express
- Flask
- Playwright
- SQL
- AWS
- Mocha testing
- HTML
- CSS

Experience

LibraOffice   *Volunteer QA Engineer*
August 2023 - Current

- Swiftly addressed triage failures, identifying root causes and implementing effective solutions. Collaborated with teams to prioritize and minimize downtime.
- Integrated CI/CD pipelines, automating build, test, and deployment processes. Reduced manual interventions and accelerated development cycles.

Scale AI   *Style Consultant*
November 2023 - Current

- Thoroughly examine code produced by AI models to pinpoint any logical inconsistencies, mistakes, or security weaknesses.
- Seek out ways to refine and enhance AI-generated code for faster performance and more efficient use of resources.
- Implement extensive testing and verification of the revised code to confirm that the changes have not led to new problems.

Food Lion   *Frontend Manager*
April 2020 - July 2021, Virginia, Virginia beach

- Managed daily store operations, including opening and closing procedures , cash reconciliation, and inventory counts; maintained 100% accuracy in all financial reportings, even in high-volume settings with reporting ranging from $10,000 to $20,000.

Projects

Pin-It   (Python, Flask, React, HTML, CSS, AWS) **Github**

- *Conceptualized a visually captivating splash page using CSS transforms, featuring a dynamic image carousel that smoothly slides up and transitions between categories on an infinite loop.*
- *Increasing user satisfaction by 100%., Designed and implemented a user-to-user commenting feature leveraging the SQLAlchemy ORM to create a new relationship table.*

Kartsy   (Flask, Python, React, HTML, CSS) **Github**

- *In a group of four software developers we designed a commerce site using Flask, HTML,CSS and React allowing users to sell any item and displaying them on the main page of the site while maintaining a git workflow with 100% accuracy.*
- *Developed a cart feature using React onClick Event Handling, allowing the users to select an item to purchase and prompting them to their cart to proceed with payment.*

Dupe-brb-loka   (Javascript, Express, react, SQL, HTML ,CSS) **Github**

- *spearheaded the creation of a review system that allows users to submit and view reviews in real-time, using React's useEffect and useSelector hooks to manage the state of the reviews component and update it dynamically based on user input.*

Education

App Academy   Degree in **Software Engineer** August 2022 - March 2023
